

# Registering an Additional Grazing Block on your current NAIT Number

Moving Day

## Be a Mate, Update NAIT

1. Choose your NAIT number you'd like to add the additional block to and click on the blue number

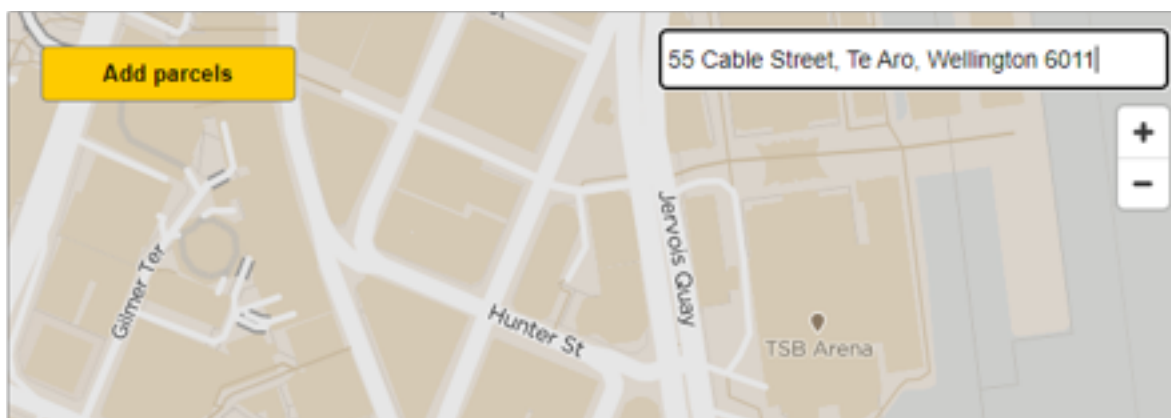

2. From the left-hand side, select "NAIT number details"

3. Scroll down to "Location Information" and select "change"

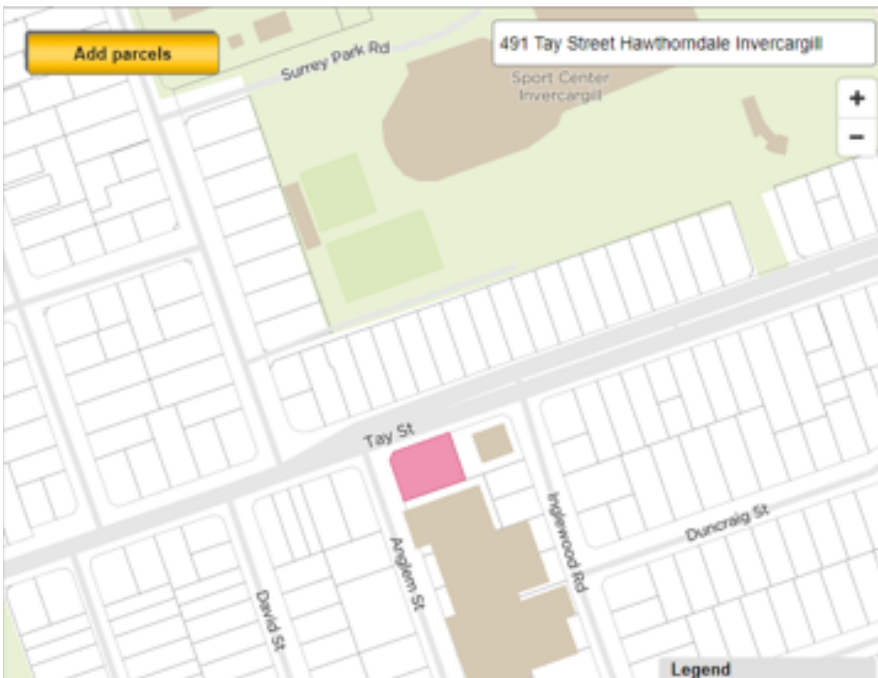

4. On the map, using the white search box in the top right-hand corner, enter the address of your additional block

5. Select “add parcels” and select the parcel of your block

6. If the address is outside of the 10km radius, it will appear in red and will not let you continue until you deselect it. If the parcel is too far away, you will need to register it with it's own NAIT number.

7. Once you've added your parcel, press continue and check your NAIT number details are up to date before ticking this box, then you're done!

I am the Person In Charge of Animals (PICA) for the location I am registering or updating. \*
