

Moving farms?

Be a mate, update NAIT

I am a Person in Charge of Animals (PICA).

AND

I have tagged and registered all of my animals and my NAIT account accurately reflects what is on farm.

Are you moving farms?

No

No action required.

Yes

Are you moving your herd to a new location?

No

Contact us to let us know that you're no longer the PICA of that NAIT number on **0800 482 463**.

Are you still going to be a PICA at another NAIT location. For example taking over an existing herd?

No

If you are no longer a PICA you do not need to be registered.

Yes

Ensure you are correctly registered as the PICA for the new herd.

1. Register a new NAIT Number.

2. Create a movement for your herd (MUST be done within 48 hours of the movement taking place).

3. De-register your old NAIT number. Ensure you have no outstanding actions on your account before you do this such as movements/animals.

Contact us with the new location for your herd so we can update the TBfree programme.

You will need to **register** any **new grazing blocks** you are in charge of and **create movements** in NAIT for any animals **sold** or **sent to a grazing** farm.

If using 3rd party software like MINDA/myHerd ensure you let your provider know your new NAIT Location number/s and add them as an information provider.

Make sure ALL animals are registered before the movement is created.

If you have followed all of the instructions to update your NAIT details and are still struggling, our Support Centre is geared up to assist you. Call **0800 482 463** or email **info@ospri.co.nz**. For more information see **OSPRI.co.nz**.
